PROFILE

A professional engineer with experience in building full stack web applications with user friendly front-end designs that compliment new or existing database structures and maintenance protocols.

Creative and technical skills backed with 10+ years of customer service background allow me to excel in producing applications that make an impact for the end user and retain client relationships.

SKILLS

- Project Management
- RESTful API Implementation
- CRUD Database Maintenance
- Solution based Problem-Solving
- Strong Communication
- A Great Team Player

- Technologies

HTML CSS Bootstrap

Javascript jQuery Node JS

Express JS SQL React MongoDB

PROJECTS

TECH HUB

<https://lionsgatetech.herokuapp.com/>

CMS Tech Social Media App

- Stored secure data on a MySQL database + Sequelize ORM
- Created full CMS CRUD operations for user interactions
- New users can experience the site but cannot access full features until signed in

EMPLOYEE TRACKER

<https://github.com/JasmineDaniels/AmberLights>

Cli Application

- Structured MySQL database queries using pure SQL
- Built the logic for a streamlined cli menu complete with input validation

UNPACK APP

Trip Planner

<https://github.com/ms13380/Trip-Planner>

<https://ms13380.github.io/Trip-Planner/>

A collaborative project that I really enjoyed is UnPack App, a trip planning app that provides the weather, distance, and directions for your desired locations. My contribution focused on the UI and the population of the cards with weather data retrieved from the Open Weather Map api.

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

Full Stack Bootcamp

2022

GWINNETT TECHNICAL COLLEGE

Business Administration

2015 - 2018
